A New Way to Fund Energy Efficiency Projects

With the right financing, you can make energy efficiency projects a reality. They can be done now, and they can be done for less.

By Steve Kohnert

Why aren't more building owners taking advantage of the "low-cost" financing options available to them? The answer is simple: they don't know about them.

The first barrier to energy efficiency is a lack of information. Many building owners don't know about the financing options available to them. They don't know about the "low-cost" financing options available to them. They don't know about the "low-cost" financing options available to them.

Energy efficiency is a key part of a building's long-term success. It can help reduce energy costs, improve indoor air quality, and increase the value of the building. But many building owners don't know about the financing options available to them. They don't know about the "low-cost" financing options available to them. They don't know about the "low-cost" financing options available to them.
